KATADYN MICROPUR® MPI WATER PURIFICATION TABLETS

OUTPUT: 1 tablet treats 1 quart (1 liter) of water.

USE: Open foil package (use knife if necessary) and drop tablet directly into contaminated water. DO NOT TOUCH TABLET! Keep treated water out of direct sun if possible. Wait time is based on water temperature and how dirty the water being treated is; see table below:

<table>
<thead>
<tr>
<th>Microorganisms Killed</th>
<th>EPA Water #1 (clear, 20°F)</th>
<th>EPA Water #2 (dirty, high organic content, 4°C/40°F)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bacteria</td>
<td>15 Minutes</td>
<td>15 Minutes</td>

<tr>
<td>Virus</td>
<td>15 Minutes</td>
<td>15 Minutes</td>
</tr>
<tr>
<td>Protozoa/Cysts</td>
<td>30 Minutes</td>
<td>4 Hours</td>
</tr>
</tbody>
</table>

Note that instructions printed on the MPI packaging have an EPA mandated 4-hour contact time for worst case scenario. In many instances you can use the shorter contact times in this table compiled from the official EPA registration test results. MPI Tablets have a 3-year replacement interval. Order replacements at: www.katadyn.com

STAINLESS STEEL BALL CHAIN

Use the Ball Chain to secure Fox40 Rescue Howler Whistle, CRKT RSK® Mk5 Knife, Rescue Flash Signal Mirror and eGear PICO® Lite. You may use a loop of Utility Wire or Braided Nylon Cord to attach the Compass to the Ball Chain. Place around neck and secure under clothing if possible. Alternatively, secure Ball Chain to belt loop and keep survival gear in pocket.

WARNING: Ball Chain and attached survival gear can slip off neck if not otherwise secured or if you bend over too far.

CRKT RSK® Mk5 KNIFE

The compact RSK® Mk5 cannot completely replace a full-sized knife, but it will perform the tasks of a much bigger knife, if used intelligently. If you are relying upon this RSK® Mk5, then most likely it is because it is now your only knife. Treat it with respect and care so it is not damaged or lost and it can help save your life.

The lanyard attached to your RSK® Mk5 helps provide a more secure and comfortable grip by effectively lengthening the short handle. Adjust the position of the cord lock so that when you grasp the knife and lanyard, the cord lock fits snugly into the end of your fist. Alternatively, loop the lanyard around your pinkie finger until the knife is snug in your hand.

With a small knife like the RSK® Mk5, you must rely upon finesse for larger cutting jobs, not brute force. Patience will allow you to cut larger limbs or saplings. Cut or carve out a notch around the limb or trunk, which may take numerous small slices or cuts, and then carefully break. In testing, 3-inch (7 cm) diameter saplings were cut down using this technique. Any limb will cut easier if kept undereased.

WARNING: DO NOT use the RSK® Mk5 to PRY or as a SCREWDRIVER. DO NOT HAMMER on the knife. The KNIFE EDGE is SHARP, use with extreme care to prevent injury. ALWAYS KEEP THE KNIFE IN SHEATH EXCEPT WHEN IN USE.

OPENING & CLOSING: PNEUMO ZIP POUCH IN COLD WEATHER

Cold can stiffen the pouch’s zipper seal, making it more difficult to open and close.

TO OPEN: DO NOT pull tabs straight apart. Grasp pull-tabs and roll down to open.

TO CLOSE: Place pouch on hard surface. Start at one end and press down along the zipper seal to close.

DISCLAIMER and WARNING: For survival purposes only. Any survival situation is inherently dangerous and could result in any survivor’s injury, maiming or death. Douglas Ritter, Equipped To Survive Foundation, Inc., and Tender Corporation do not assume any responsibility for the use or misuse of any of the equipment or information included in this survival kit.
