

Custom Sheath Makers
(list updated 11/04/2024)

The companies and individuals listed below have demonstrated that they produce a quality product and provide reasonable or better customer service, either to me or to friends that I trust. Some of these makers have an RSK® Mk3-G2 in stock to work from, some may need your knife to make the sheath.

Having said that, inclusion in this listing does not imply any endorsement of the company or its products. If a problem occurs, I will not get involved. Do your own research to determine if you want to do business with anyone on this list. However, I would like any feedback, good or bad, you might offer based on your dealings with anyone on this list.

Kydex, Boltaron (and similar materials)
